

October 29, 1963

TO: Dr. Joe Hall, Superintendent and Secretary

FROM: Dr. Pauline M. Rojas, Director, Ford Foundation Project
Mr. Ralph F. Robinett, Assistant Director, Ford Foundation Project

SUBJECT: A REPORT- PROGRESS REPORT ON FORD FOUNDATION PROJECTS

PART ONE - INTRODUCTION

The projects to which we are committed under the Ford Foundation grant are as follows:

1. The preparation of reading materials for non-English speaking bilingual pupils entering first grade.
2. The revision or adaptation of the books of the Fries American English Series for non-English speaking bilingual pupils who can read and write their vernacular.
3. The preparation of guides and audio-visual materials for teachers of bilingual pupils.
4. The establishment of a bilingual school.

CONSULTANT SERVICES

Among the specialists who have agreed to look over our work and advise us are: Dr. Charles A. Ferguson, Director of the Center for Applied Linguistics; Dr. Theodore Clymer, President of the International Reading Association; Dr. C. C. Fries, a linguist in the field of English, now retired from the University of Michigan; Dr. Ross R. Macdonald, a linguist in the field of English, now working

on a machine translation project in Washington; Dr. Warren C. Cutts, specialist for reading of the U. S. Office of Education; and Dr. Alfred S. Hayes, Assistant Director for Research Center for Applied Linguistics.

We are in the process of contacting at present Dr. John B. Carroll, psychologist at Harvard; Dr. Nelson Francis, linguist in the field of English at Brown University; Dr. David Reed, linguist interested in reading at U.C.L.A., and Dr. Wallace Lambert, psychologist at McGill University in Montreal.

PART TWO - OVERVIEW OF PROGRESS TO DATE

The grant became operative on January 1, 1963, the staff at that time consisting of the coordinator and the director only. The assistant director took over his duties on March 1, with instructions to spend some time acquainting himself with the on-going bilingual program for Cuban refugee pupils and with Dade County schools in general. In the late spring it was decided that the bilingual school would be organized in Coral Way Elementary and that an in-service curriculum workshop would be held there during the summer for the teachers who would teach the bilingual groups in the fall. This workshop would be held simultaneously with the in-service training workshop for teachers of English as a second language in the county wide bilingual program for Cuban refugee pupils. Both the Assistant Director and the Coordinator for Bilingual Education participated full time in these summer in-service training workshops. Almost all of the other members of the staff were to some degree involved in these summer programs. The Director also spent approximately three weeks visiting workshops on the teaching of English as a second language in Phoenix, Arizona; Tuscon, Arizona; San Jose, California; and Albuquerque, New Mexico. On August 1, work began on the reading materials project and on September 3, classes began in the bilingual school.

The staff is now working on the language units upon which the reading materials will be based. As the language materials and reading materials are prepared, they will be submitted to specialists for their suggestions, then revised, and finally tried out this year in certain classrooms of Spanish-speaking first graders in Dade County. It is expected that by next fall a body of materials will be ready to be tried out in other areas where there are large numbers of Spanish-speaking pupils, provided arrangements can be made with school systems in suitable locations. For the time being nothing is being done on the revision of the Fries Series books nor on the audio-visuals. The revision project will be started as soon as the reading materials projects gets well enough along that part of the staff can be freed for working on it. The audio-visuals will be a natural outgrowth of the various materials as they are developed.

We feel that we have an excellent staff, among whom there is a variety of abilities and talents. We are satisfied that in spite of the unavoidable delay in getting organized and the time devoted to the summer programs, we are moving ahead satisfactorily.

PART THREE - SPECIAL REPORT ON THE BILINGUAL SCHOOL

Our bilingual school represents a unique venture in American education. To our knowledge it is the only one of its kind to have been established so far. Because of the unusual interest it has aroused, we are including herein a detailed report on its organization and functioning .

PMR:REF/am

PROGRESS REPORT ON THE BILINGUAL SCHOOL PROJECT

Expected Outcome

The expected outcomes of the program in bilingual instruction initiated in the Coral Way Elementary School are as follows:

1. The participating pupil will have achieved as much in the way of skills, abilities, and understandings as he would have had he attended a monolingual school and in addition will have derived benefits which he could not have attained in a monolingual school.
2. He will be approximately as proficient in his second language as he is in his first. If he is a skilled reader in his first language, he will be a skilled reader in his second language. If he has mastered the fundamental processes and concepts in arithmetic in one language, he will handle them equally well in the other language. If he can express himself clearly and adequately in his first language he will be able to do likewise in the other language.
3. He will be able to operate in either culture easily and comfortably.
4. He will have acquired consciously or unconsciously an understanding of the symbolic nature of language and as a result will be able to achieve greater objectivity in his thinking processes.
5. In general terms he will be more acceptive of strange people and cultures and will thus increase the range of his job opportunities.
6. He will have skills, abilities and understandings which will greatly extend his vocational potential and thus increase his usefulness to himself and the world in which he lives.
7. He will broaden his understanding of people and the world and be able to live a richer fuller and more satisfying personal life.

Organization

During the first year of this project, 1963-64, twelve groups of pupils are involved: four first grade groups; four second grade groups; and four third grade groups. At each of the grade levels, two groups are made up of native speakers of English and two of native speakers of Spanish. An additional grade level will be added each year until the six grade levels will be participating.

There are twelve teachers and three teacher aides working in the program. The teachers at each grade level are paired off into teams consisting of one native speaker of English and one native speaker of Spanish. The native English speaking teacher of each team is responsible for the academic instruction in English of one group of native English speaking pupils and one group of native Spanish speaking pupils. The native Spanish speaking teacher is responsible for the academic instruction in Spanish of these two groups of pupils. The three teacher aides assist in the music, art, physical education, and supervised play activities in all three grade levels, and use both English and Spanish as media of instruction.

The pupils participating in the bilingual program will receive approximately half of their instruction in each language. The time devoted in instruction in the second language is staged so as to increase the proportion gradually. During the first year the staging affects all three grade levels. In subsequent years it will affect the first grade only. The time allotted to the learning of the basic skills and concepts compares favorably with the time regularly allotted in Dade County in monolingual schools, the only difference being that in the bilingual school the time is divided between the two languages. In the beginning stages the basic skills and concepts are always introduced in the first language of the child. These skills and concepts are then incorporated into the second language program as part of a language learning experience. In this way the child reinforces the concepts and skills and at the same time advances in his mastery of the second language.

Selection of Participants

The pupils in the program are pupils who would normally attend the Coral Way School. Inasmuch as the native Spanish speaking pupil in the school have been proportionately fewer than the native English speaking pupils, it has been necessary to open enrollment to Spanish speaking pupils from nearby Riverside and Shenandoah Elementary schools. Participation is voluntary and provision has been made for pupils who do not choose to participate. Participation is not limited to pupils with records of superior academic achievement. Only a few pupils with extremely low records were screened out after consultation with their parents. In general, the pupils reflect the normal range of the school population.

The native English speaking teachers were selected from interested faculty in the school and participated in an in-service training program during the summer of 1963. The native Spanish speaking teachers and the teacher aides were selected in part from the staff of the school and in part from other schools; all were experienced personnel of the Dade County system who had successfully completed a special training course at the University of Miami.

Teacher Training and Curriculum Development

As part of the summer in-service training program, a curriculum workshop was held, in which all teachers and aides working in the bilingual program participated. In this workshop, the principal, teachers, and aides, with the cooperation of consultants from the staff of the Board of Public Instruction, developed detailed plans and schedules for all aspects of the curriculum. In seven curricular areas, special attention was given to problems resulting from the bilingual nature of the program. Detailed linguistic sequences for the English as a second language and Spanish as a second language were developed in order to incorporate the concepts of the several content areas in the curriculum. Science was given special attention because the availability of parallel texts in English and Spanish make it possible to sharpen the science concepts through their study in divergent cultural settings. Spanish as the vernacular was given special attention because no satisfactory program was available and one had to be created. Music, art, and physical education were given special attention because in these areas intracultural relations will be greatest in the organization as it now stands. In all areas of the curriculum, the program in the bilingual school incorporates and is in harmony with the regular Dade County program as it appears in the official curriculum bulletins.

For the instruction in English, the state adopted texts in the school continue to be used. The only English texts especially ordered for the bilingual program are the three titles of the 1961 Heath Science Series, which served as the basis for the Spanish edition to be used in the program. For the instruction in Spanish, three series of texts were ordered: a Spanish basal reader series, the Spanish translation of the science series mentioned above, and a Spanish health series. All of these series are new and published by American publishers, and reflect modern American pedagogy in their approach to the content. Supplementary reading and reference materials in Spanish have been ordered for the library.

Long Range Evaluation

A design for evaluating the bilingual program is now being prepared. Appropriate devices are being assembled, such as standardized tests for English as a second language and general ability tests in Spanish, and contacts are being made for cooperative research with other school systems concerned with English as a second language or bilingual instruction.

Evaluation of Progress to Date

An analysis of the development of the program thus far leads us to conclude that the project is moving satisfactorily. The careful selection of personnel and the preliminary planning have been major factors contributing to a smooth beginning of a complex project. At this time two administrative problems confront the project: the need for increased enrollment of Spanish speaking pupils and the need for regrouping pupils in accordance with their proficiency in the second language. Both problems are under consideration and solutions can be expected in the immediate future. On the instructional level the basic need is for cooperative planning and teaching in the area of second language instruction. A systematic approach to this problem will be initiated by the end of the current month.

2:05-2:25	20	Grade 2 - Team I - Sing
2:25-3:00	20	Clerical Duties

APPENDIX E

PROJECTED LONG RANGE TESTING PROGRAM

Testing 1963-64

1. Compare pupils in grades 2 through 6 in the English Sections and Regular Sections.

Are the test scores of the pupils in grades 2 through 6 the same as, higher than, or lower than those of previous years, for example 1960 and 1962?

In 1966 when the pupils who are now in grades 2 and 3 are in grades 5 and 6, will the tests scores of these pupils be the same as, higher than, or lower than those of the pupils who are now in grades 5 and 6?

Are the tests scores of the pupils in grades 2 and 3 of the English Sections the same as, higher than, or lower than the pupils in grades 2 and 3 of the Regular Sections?

In subsequent years, will the tests scores of pupils who are in grades 2 and 3 in the English Sections be the same as, higher than, or lower than those of the pupils who are now in grades 2 and 3 of the Regular Sections?

2. Compare pupils in grades 2 through 6 in the English Sections and Regular Sections of Coral Way with pupils in grades 2 through 6 in other schools.

Have the test scores of the pupils in grades 2 through 6 in Coral Way been the same as, higher than, or lower than those of pupils in grades 2 through 6 in other schools in previous years, for example 1960 and 1962?

Are the test scores of the pupils in grades 2 through 6 in Coral Way the same as, higher than, or lower than pupils in grades 2 through 6 in other schools?

In subsequent years, will the test scores of the pupils who are now in grades 2 and 3 in Coral Way be the same as, higher than, or lower than those of pupils who are now in grades 2 and 3 in other schools?

3. Compare the growth in English of pupils in grades 2 and 3 of the Spanish Sections with the growth in English of Spanish-speaking pupils in other schools who have had all their schooling in Dade County.

How well do Spanish-speaking pupils who study only half time in English compare with Spanish-speaking pupils who study full time in English?

Testing 1964-65

1. Compare pupils in grades 2 through 4 in the English Sections and pupils in grades 2 through 4 in the Regular Sections.

How do English-speaking pupils in the English Sections compare with pupils in the Regular Sections?

2. Compare pupils in grades 2 through 4 in the English Sections and Regular Sections against Coral Way pupils in grades 2 through 4 in 1962.

How do English-speaking pupils in Coral Way in 1964 compare with the base line groups of 1962?

3. Compare pupils in grades 2 through 4 in the English Sections and Regular Sections with Regular pupils in other schools.

How do English-speaking pupils in grades 2 through 4 of the bilingual school compare with regular pupils in other schools in 1964?

4. Compare the growth in English of pupils in grades 2 through 4 in the Spanish Sections and the growth in English of Spanish-speaking pupils in other schools.

How do Spanish-speaking pupils who study in English half time compare with Spanish-speaking pupils who study in English full time?

5. Compare the general growth of pupils in grades 2 through 4 in the Spanish Sections with the general growth of Spanish-speaking pupils in a Spanish-speaking country.

How do Spanish-speaking pupils who study in Spanish half time compare with Spanish-speaking pupils who study in Spanish full time in a Spanish-speaking country?

Testing 1965-66

1. Compare pupils in grades 2 through 5 in the English Sections and pupils in grades 2 through 5 in the Regular Sections.

How do English-speaking pupils in the English Sections compare with pupils in the Regular Sections?

2. Compare pupils in grades 2 through 5 in the English Sections and Regular Sections against Coral Way pupils in grades 2 through 5 in 1962.

How do English-speaking pupils in Coral Way in 1965 compare with the base line groups of 1962?

3. Compare pupils in grades 2 through 5 in the English Sections and Regular Sections with regular pupils in other schools.

How do English-speaking pupils in grades 2 through 5 of the bilingual school compare with regular pupils in other schools in 1965?

4. Compare the growth in English of pupils in grades 2 through 5 in the Spanish Sections and the growth in English of Spanish-speaking pupils in other schools.

How do Spanish-speaking pupils who study in English half time compare with the Spanish-speaking pupils who study in English full time?

5. Compare the general growth of pupils in grades 2 through 5 in the Spanish Sections with the general growth of Spanish-speaking pupils in a Spanish-speaking country.

How do Spanish-speaking pupils who study in Spanish half time compare with Spanish-speaking pupils who study in Spanish full time in a Spanish-speaking country?

Testing 1966-67

1. Compare pupils in grades 2 through 6 in the English Sections and pupils in grades 2 through 6 in the Regular Sections.

How do English-speaking pupils in the English Sections compare with pupils in the Regular Sections?

2. Compare pupils in grades 2 through 6 in the English Sections and Regular Sections against Coral Way pupils in grades 2 through 6 in 1962.

How do English-speaking pupils in Coral Way in 1966 compare with the base line groups of 1962?

3. Compare pupils in grades 2 through 6 in the English Sections and Regular Sections with regular pupils in other schools.

How do English-speaking pupils in grades 2 through 6 of the bilingual school compare with regular pupils in other schools in 1966?

4. Compare the growth in English of pupils in grades 2 through 6 in the Spanish Sections and the growth in English of Spanish-speaking pupils in other schools.

How do Spanish-speaking pupils who study in English half time compare with Spanish-speaking pupils who study in English full time?

5. Compare the general growth of pupils in grades 2 through 6 in the Spanish Sections with the general growth of Spanish-speaking pupils in a Spanish-speaking country.

How do Spanish-speaking pupils who study in Spanish full time compare with Spanish-speaking pupils who study in Spanish full time in a Spanish-speaking country?

Testing - End of School Year 1966-67

1. Compare pupils in grade 6 in the English Sections and Regular Sections.

How do the English-speaking pupils in the English Sections who have had two years of English monolingual instruction and four years of bilingual instruction compare with English-speaking pupils in the Regular Sections who have had six years of monolingual instruction?

2. Compare pupils in grade 6 in the Spanish Sections with pupils in grade 6 in the English Sections.

How do Spanish-speaking pupils after two years of English monolingual instruction and four years of bilingual instruction compare in English curriculum with English-speaking pupils in the same instructional plan?

How do Spanish-speaking pupils after two years of English monolingual instruction and four years of bilingual instruction compare in Spanish curriculum with Spanish-speaking pupils in the same instructional plan?

Testing 1967-68, 1968-69

The pattern of testing of 1966-67 would be continued for 1967-68 and 1968-69, at which time pupils who began in the first grade in the bilingual program will be finishing the sixth grade.

	Starting 3rd Grade	Starting 2nd Grade	Starting 1st Grade
1963-64	3	2	1
1964-65	4	3	2
1965-66	5	4	3
1966-67	6	5	4
1967-68		6	5
1968-69			6

APPENDIX B

PROJECTED LONG RANGE TESTING PROGRAM

Testing 1963-64

1. Compare pupils in grades 2 through 6 in the English Sections and Regular Sections.

Are the grades of the pupils in grades 2 through 6 the same as, higher than, or lower than those of previous years, for example 1960 and 1962?

In 1964 when the pupils who are now in grades 2 and 3 are in grades 3 and 6, will the grade of these pupils be the same as, higher than, or lower than those of the pupils who are now in grades 3 and 6?

Are the grades of the pupils in grades 2 and 3 of the English Sections the same as, higher than, or lower than the pupils in grades 2 and 3 of the Regular Sections?

In subsequent years, will the grades of pupils who are in grades 2 and 3 in the English Sections be the same as, higher than, or lower than those of the pupils who are now in grades 2 and 3 of the Regular Sections?

2. Compare pupils in grades 2 through 6 in the English Sections and Regular Sections of Coral Way with pupils in grades 2 through 6 in other schools.

Have the grades of the pupils in grades 2 through 6 in Coral Way been the same as, higher than, or lower than those of pupils in grades 2 through 6 in other schools in previous years, for example 1960 and 1962?

Are the grades of the pupils in grades 2 through 6 in Coral Way the same as, higher than, or lower than pupils in grades 2 through 6 in other schools?

In subsequent years, will the grades of the pupils who are now in grades 2 and 3 in Coral Way be the same as, higher than, or lower than those of pupils who are now in grades 2 and 3 in other schools?

3. Compare the growth in English of pupils in grades 2 and 3 of the Spanish Sections with the growth in English of Spanish-speaking pupils in other schools who have had all their schooling in Dade County.

How well do Spanish-speaking pupils who study only half time in English compare with Spanish-speaking pupils who study full time in English?
